SUMMARY

DevOps Engineer with 4+ years of experience designing and managing cloud-native infrastructure across AWS, Azure, and VMware environments. Skilled in Kubernetes, Terraform, GitOps, and observability engineering, with proven success leading infrastructure migrations and optimizing production reliability in hybrid cloud ecosystems.

SKILLSET

Technical Skills:

- **Cloud & Infrastructure:** AWS, Azure, VMware ESXi, GCP
- **Containers:** Docker, Kubernetes (EKS, AKS, Self-hosted)
- **CI/CD:** GitLab CI, GitHub Actions, TeamCity, Jenkins
- **IaC:** Terraform, Ansible
- **Monitoring:** Prometheus, Grafana, VictoriaMetrics, ELK
- **OS:** Linux, Windows Server

WORK EXPERIENCE

Tenforce *Jan 2024 – present*
DevOps *Ahmedabad, India*

- Led VMware ESXi data center migration for 500+ workloads with zero major downtime, completed in 10 months.
- Migrated 3TB ELK, Prometheus and Grafana stack to on-premises, reducing costs by 80%.
- Improved observability and reduced incident response time by 20% across environments.
- Designed reliable infrastructure for enterprise .NET applications across DEV–PROD.
- Built and optimized CI pipelines using GitLab and TeamCity, reducing deployment time by 15%.
- Automated Redis deployment using Ansible, enabling centralized one-click provisioning.
- Standardized Grafana dashboard for Windows Exporter and Filebeat deployments via Ansible and GitLab CI.
- Developed Terraform modules for ESXi VM provisioning, cutting setup time from 3 hours to 75 minutes.
- Built PowerShell automation tool for Windows server setup, reducing configuration time by 80%.
- Implemented and managed Web Application Firewall (WAF) across multiple production environments.

Aniccadata *Jan 2022 – Dec 2023*
DevOps *Bengaluru, India*

- Designed and deployed AWS EKS and Azure AKS clusters.
- Built end-to-end CI/CD pipelines using Jenkins and GitHub Actions.
- Reduced release cycle time by 30% through CI/CD automation.
- Automated infrastructure provisioning using Terraform and Azure IaC modules.
- Containerized applications using Docker, improving deployment consistency.
- Implemented Prometheus and Grafana monitoring with proactive Slack alerts.
- Configured HTTPS load balancers and SSL certificates via AWS ACM.
- Improved application uptime to 99.95% through monitoring and scaling strategies.

EDUCATION AND CERTIFICATION

Bachelor of Arts (BA) *2014 – 2018*
Hindu College

Full Stack Development Certification *June 2021 – Dec 2021*
Newton School

Higher Secondary (Science) *2012 – 2014*
CBSE
